# ES3 Digital Piano

## TOUCH

Kawai's new Advanced Hammer Action III brings the feel of a real grand piano to the ES3. Its graded hammer action design offers superb response and a smooth feel to satisfy even the most demanding professional.

## TONE

The ES3 uses our critically-acclaimed Harmonic Imaging™ sound technology... the same technology used in all our award-winning digital pianos. Harmonic Imaging creates an acoustic piano sound of remarkable depth, expression and realism. You'll also be impressed with the other sounds of the ES3... Strings, Electric Piano, Organ – 21 sounds in all. And, any two sounds can be combined together in a DUAL or SPLIT mode.

## Sound System

The ES3 sound system uses an innovative design in which the stereo speakers face out from the rear panel. A port system releases sound from the top panel toward the player. This unique system delivers a surprising amount of sound volume while creating a natural sound for the player.

## RECORDER

The ES3 features a simple-to-operate 4-song, 2-part, Recorder that can record up to 10,000 notes.
