

DIGITAL PIANO *EP3*

Versatile. Powerful. Portable.

Regardless of whether you're playing a gig on stage, practicing for a piano recital at home, accompanying the local church choir, or studying Beethoven in the classroom, the EP3 is ideal. Compact and portable, this multi-purpose digital piano offers an authentic weighted keyboard action, impressively powerful speaker system, and an intelligent selection of great sounds, providing a range of musical opportunities – wherever the venue, and whatever the occasion.

POWERFUL SPEAKER SYSTEM

The EP3 features an improved 6-speaker sound system, utilizing speaker box enclosures to provide deep bass and crisp treble frequencies. This unique design allows for a compact, portable instrument that is ideal for live stage performances, while stereo LINE IN and LINE OUT jacks provide connectivity to audio devices such as MP3 players and amplifiers.

EXCEPTIONAL TONE

The EP3 captures the beautiful sound of KAWAI's highly acclaimed hand-crafted concert grand pianos, employing proprietary Harmonic Imaging™ technology to faithfully reproduce the broad dynamic range of these exceptional instruments. Additional string resonance and damper effects are also applied, delivering rich tones with breathtaking authenticity.

AUTHENTIC PIANO TOUCH

The redesigned Advanced Hammer Action IV-F keyboard accurately represents the touch of a traditional grand piano, grading key weight appropriately for each playing range. This inventive process allows greater stability during fortissimo passages, while preserving delicate pianissimo control, to satisfy the demands of even the most discerning pianist.

PROFESSIONAL FEATURES

The EP3 is equipped with a host of powerful and professional features to assist both practice and performance. There's a built-in metronome with an additional 30 drum rhythms; USB to host for easy connectivity to computers; and even an audio input for connecting your favorite MP3 player, or other audio device, to the EP3's powerful speaker system.
