

3 ch PARAMETRIC EQUALIZER

EQ-8

- Thank you for purchasing KAWAI 8-channel Parametric Equalizer EQ-8!
This Owner's Manual contains valuable information that will help you make full use of this instrument's many capabilities.
Read it carefully and keep it handy for future reference.

Features

- A compact rack-mount (one space) parametric equalizer which allows you to equalize up to 8 instruments separately.
- Wide-range gain capacity that permits controlling of different levels from keyboards, guitars and microphones.
- Wide or narrow tone control by switching the "Q" function.
- Broad frequency response (50Hz~15kHz).
- More sensitive tone control by linking equalizers together.
- High signal-to-noise ratio to meet today's highest studio requirements.

■ Controls

(1) Front Panel

- ① **POWER SWITCH** ————— Make sure that the volume control of the connected mixer (or similar devices) is at its minimum level before turning this switch on or off.
- ② **POWER INDICATOR** ————— This LED lights when the power is on.
- ③ **GAIN (1, 3ch: L/M/MIC)** ————— These three-position switches allow you to adjust the channel gain to match the input level. The ones on channels 1 and 3 substitute a special microphone (MIC) position for the highest gain.
(2, 4~8ch: L/M/H)
- ④ **Q** ————— Selects one from three different curves which sets the equalizing (“Quality-Factor”: “^”, “^”, “^”) slope from the central frequency to the edge.
- ⑤ **FREQ. RANGE (×0.1, ×1)** ————— Selects the frequency range to be equalized.
- ⑥ **FREQ.** ————— Selects the frequency point to be equalized.
- ⑦ **LEVEL** ————— Boosts or cuts the level of frequency selected at ⑤ and ⑥.

■ Example of equalizing

- ① **If you want to prevent noise and “feedback”...** ————— Select the Q “^” so that the frequency area which mainly causes the noise and feedback will be cut. In this case you should care not to cut more than necessary to avoid degenerating the sound color.

- ② **If you want to boost both of bass and treble sound...** ————— Firstly you should “LINK” ch1 and ch2 (See next page). And select:

- (ch1) Q: “^”
FREQ: “× 1”
And boost around 8kHz.
- (ch2) Q: “^”
FREQ: “× 0.1”
And boost around 50~100Hz.

■ Important Notes

- * Use only the AC adaptor shipped with the EQ-8, and always connect it to a proper power supply.
- * Use separate circuits for equipment that consumes a lot of power or generates line noise.
- * Protect the equalizer from dust, heat, humidity, and direct sunlight.
- * Turn all the power switches off before connecting or disconnecting equipment.
- * Clean the equalizer with a clean, dry cloth.
(Do not use benzene, paint thinner, or other solvents.)

(2) Rear Panel

- ⑧ INPUT (1~8ch) ————— Connects the instruments to be controlled.
(Microphones can be used in channels 1 & 3.)
- ⑨ OUTPUT (1~8ch) ————— These terminals send the output signal to a mixer or other devices.
- ⑩ DC IN ————— This jack accepts the plug from the AC adaptor.

LINK operation

EQ-8 is normally used as a 8IN/8OUT single-device parametric equalizer. But the individual equalizers are internally linked in pairs and can be used as for 2 band equalizers (1 & 2, 3 & 4, 5 & 6, 7 & 8).

* Example (If you want to "LINK" ch1 and ch2...)

(1) Connect the instrument to EQ-8 as below:

(2) Use the switches of ch1 and ch2 on the front panel to control the sound.

NOTE: This "LINK" operation is available when selecting combinations of 1 & 2, 3 & 4, 5 & 6, 7 & 8.
The GAIN switches of lower channels (2, 4, 6, 8) should be set to "M" in this operation.

Specifications

	Input Level Rating	Maximum Input Level	Input Impedance	Suitable Source Impedance
Input (L)	0dBm	21dBm	10kΩ	Less than 1kΩ
(GAIN SW) (M)	-10dBm	11dBm	10kΩ	Less than 1kΩ
(H)	-20dBm	1dBm	10kΩ	Less than 1kΩ
(MIC)	-45dBm	-24dBm	10kΩ	Less than 1kΩ

	Output Level Rating	Maximum Output Level	Output Impedance	Suitable Load Impedance
Output (1-8ch)	-10dBm	10.5dBm	1kΩ	More than 5kΩ

Connectors	DC INPUT JACK	: 1
	INPUT JACK (PHONE)	: 8
	OUTPUT JACK (PHONE)	: 8
Panel Controls	GAIN (L/M/MIC)	: 2
	(L/M/H)	: 6
	EQUALIZER Q SW	: 8
	// FREQUENCY RANGE SW	: 8
	// FREQUENCY POINT	: 8
	// LEVEL VOLUME	: 8
	POWER SW	: 1
Indicator	POWER INDICATOR	: 1
Equalizer	FREQUENCY RANGE (×1)	: 500Hz - 15kHz
	(×0.1)	: 50Hz - 1.5kHz
	Q	: 0.8/2/6 = \wedge / \wedge / \wedge
Frequency Response	LEVEL	: ±15dB
	GAIN SW L/M/H	: 20Hz - 70kHz (within $\begin{matrix} +0.5 \\ -3 \end{matrix}$ dB/kHz)
	GAIN SW MIC	: 25Hz - 30kHz (")
Residual Noise	GAIN SW L/M/H	: -95dBm (IHF-A curve, input terminal short-circuited)
	GAIN SW MIC	: -86dBm (IHF-A curve, input terminal short-circuited)
		: Less than 70dB
Crosstalk		: Less than 0.05% (50Hz - 10kHz, output level 0dBm)
Total Harmonic Distortion		
Power Supply		: DC12V AC adaptor
Power Consumption		: 3.2W
Dimensions (mm)		: 44 × 483 × 150 (including switches)
Weight		: 1.8 kg
Accessories		: Owner's Manual, AC adaptor
